Subject: FiOS in Shrewsbury

Dear Representative Polito,

As a longtime Verizon employee and Shrewsbury resident, I was disappointed to learn that you oppose bringing more cable and internet competition to our town. On Monday SELCO requested a cable rate increase and announced plans to offer phone service later this fall. FiOS is the most advanced technology available and Verizon will pay the entire bill to install it. Shrewsbury residents deserve the choice and businesses will demand it. Elected officials like yourself and our board of selectmen should allow the free market to work.
Sincerely,

Hugh O'Rawe
